

FLAVOR JOURNEY F1 HONEYDEW MELON

Description:

Flavor Journey F1 is a high-yielding honeydew melon hybrid known for its exceptional sweetness, green flesh, and wide adaptability to both wet and dry growing conditions. Developed for strong performance, these 5 lb. melons have a small seed cavity and are a popular choice in home gardens. Plants have a vining habit of 6' long.

Days To Maturity: 85-90

PEPINEX F1 CUCUMBER

Description:

Pepinex F1 cucumbers are a hybrid, English-type known for their exceptionally long (12-14 inches), slender, and bitter-free fruit with smooth, dark green, thin skin that requires no peeling. Popular with gardeners, they are highly productive, disease-resistant (particularly to powdery mildew), and suitable for both greenhouse and outdoor cultivation. Plants grow up to 6' tall with proper trellising.

Days To Maturity: 60-70 Days

WATERMELON CHELSEA

Description:

Chelsea watermelon plants are large, sprawling vine plants that typically need a considerable amount of space. They are recommended to be planted in 12" diameter hills 8' apart in all directions. The sweet, pink-fleshed, 15-20 pound fruits with white seeds will keep for several weeks once picked.

Days To Maturity: 80 - 90

DECOR PUMPKIN CASPERITA F1

Description:

Casperita pumpkins are a mini pumpkin variety with semi-bushy plants. The vines typically grow to be 24"-30" long, and each plant can produce multiple small pumpkins. This mini, 1/2-1 lb., white pumpkin has strong handles and holds its color well. Disease resistance to powdery mildew and watermelon mosaic virus.

Days To Maturity: 75 - 80

PIE PUMPKIN AMISH PIE

Description:

The Amish Pie Pumpkin is a large, heirloom winter squash variety known for its thick, firm, and sweet flesh, making it ideal for baking, especially pies. It's a pale-orange, heart-shaped squash, sometimes resembling a large acorn, and can weigh up to 60-80 pounds. Amish Pie pumpkins grow on vines, typically reaching a height of 12-24 inches. The plants spread out, requiring a space of 2'-5' per plant. Also a great choice for steaming, sautéing, baking, roasting, soups, pies and they store well.

Days To Maturity: 90 - 110

BUTTERNUT VARIETIES

ZUCCHINI

COCOZELLE

Description:

Cocozelle zucchini is an Italian heirloom variety known for its rich, nutty flavor and attractive light green stripes. Plants are bushy, non-vining, and typically grow to a height of 18"-24" with a similar spread, making them suitable for smaller gardens. Cocozelle zucchini can be harvested young or allowed to mature, and is versatile in cooking, suitable for steaming, frying, baking, and more.

Days To Maturity: 50 - 58

ZUCCHINI **Description:** YELLOW FIN F1

Yellow Fin F1 zucchini is a hybrid variety with uniform, cylindrical, golden yellow fruits. Plants have a compact bush-type and are resistant to powdery mildew. Yellowfin F1 are a high-yielding zucchini with a mild, buttery. Best used in stir-fries, roasted, or grilled. Its thin skin makes it ideal for slicing into salads or for use in yellow zucchini Parmesan fries.

Days To Maturity: 50

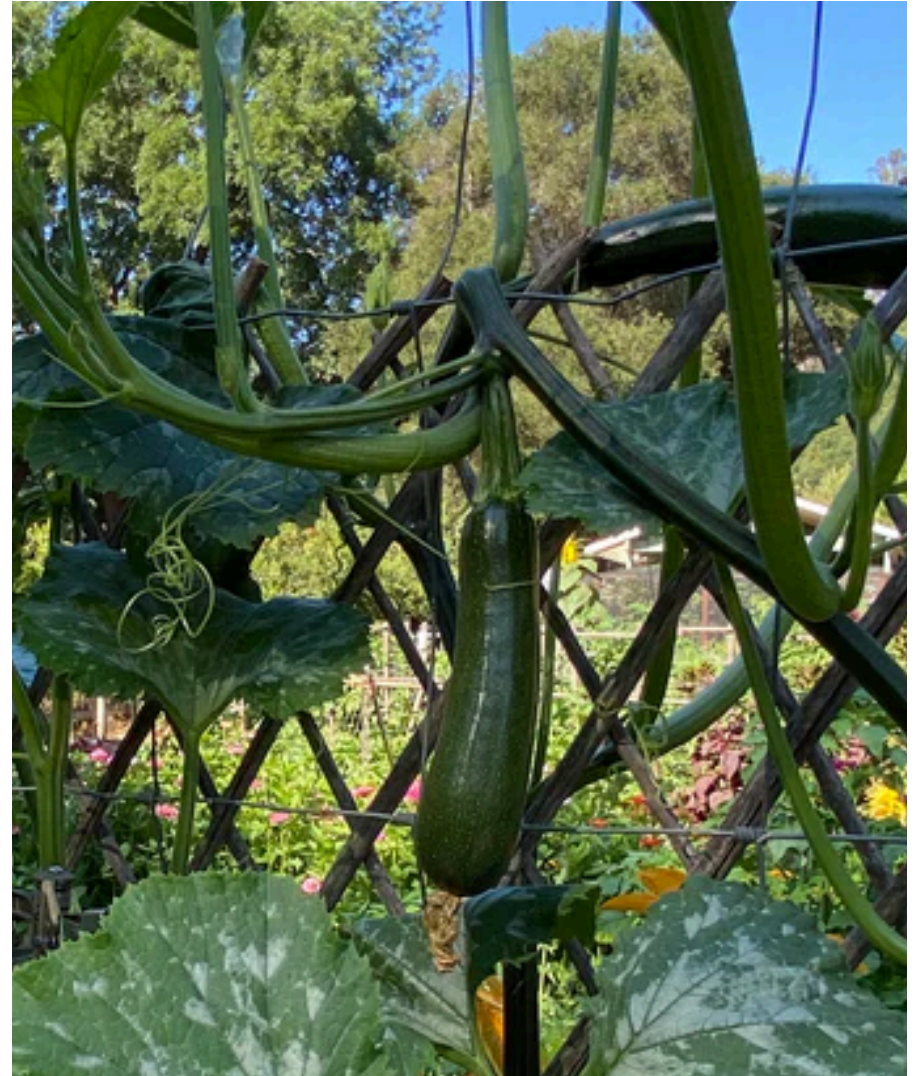

ZUCCHINI

INCREDIBLE ESCALATOR

Description:

Incredible Escalator is a hybrid variety zucchini known for it's highly productive, vigorous climbing growth pattern. It's 6' - 8' vines are perfect for vertical gardening to save space. Fruits are dark green with a nutty-tasting flavor. They are easily harvested off a trellis without bending down making it ideal for fences, arbors and trellises.

Days To Maturity: 58

ZUCCHINI

RONDE DE NICE

Description:

Ronde de Nice is a French heirloom variety of round zucchini, prized for its compact plants and delicious, tender, round fruits. They grow to a height of 18"-36" and a diameter of 18"-24". They are known for their fast growth and prolific fruit production. These zucchinis are typically pale green with a rich, nutty flavor. They are excellent for stuffing or enjoying fresh, steamed, or sautéed.

Days To Maturity: 50

ZUCCHINI DARK GREEN

Description:

Dark green zucchini plants typically grow to a height of 12"-18" and spread 18"-24". These bush-type plants are vigorous and produce early. The fruits are straight, smooth, mottled dark green with flesh that has a pale green tint, is firm, and has a fine flavor. As with any summer squash, you can harvest them at just about any size; we begin harvesting fruit when they reach about 6"-8" long. We prefer them at this young and tender stage when they are excellent lightly steamed, sautéed, or stir-fried.

Days To Maturity: 50

ZUCCHINI

COSTATA ROMANESCO

Description:

Costata Romanesco is a popular, Italian heirloom zucchini variety known for its unique appearance and flavor. It features a ribbed, fluted, and striped grey-green skin and a nutty, sweet taste. The zucchini's flavor is considered superior to many hybrid zucchini varieties, making it a favorite among gardeners and cooks. Pick at 6" or smaller and fry whole with the flower still attached. Plants typically grow to be 2'-3' tall and 3'-4' wide.

Days To Maturity: 54

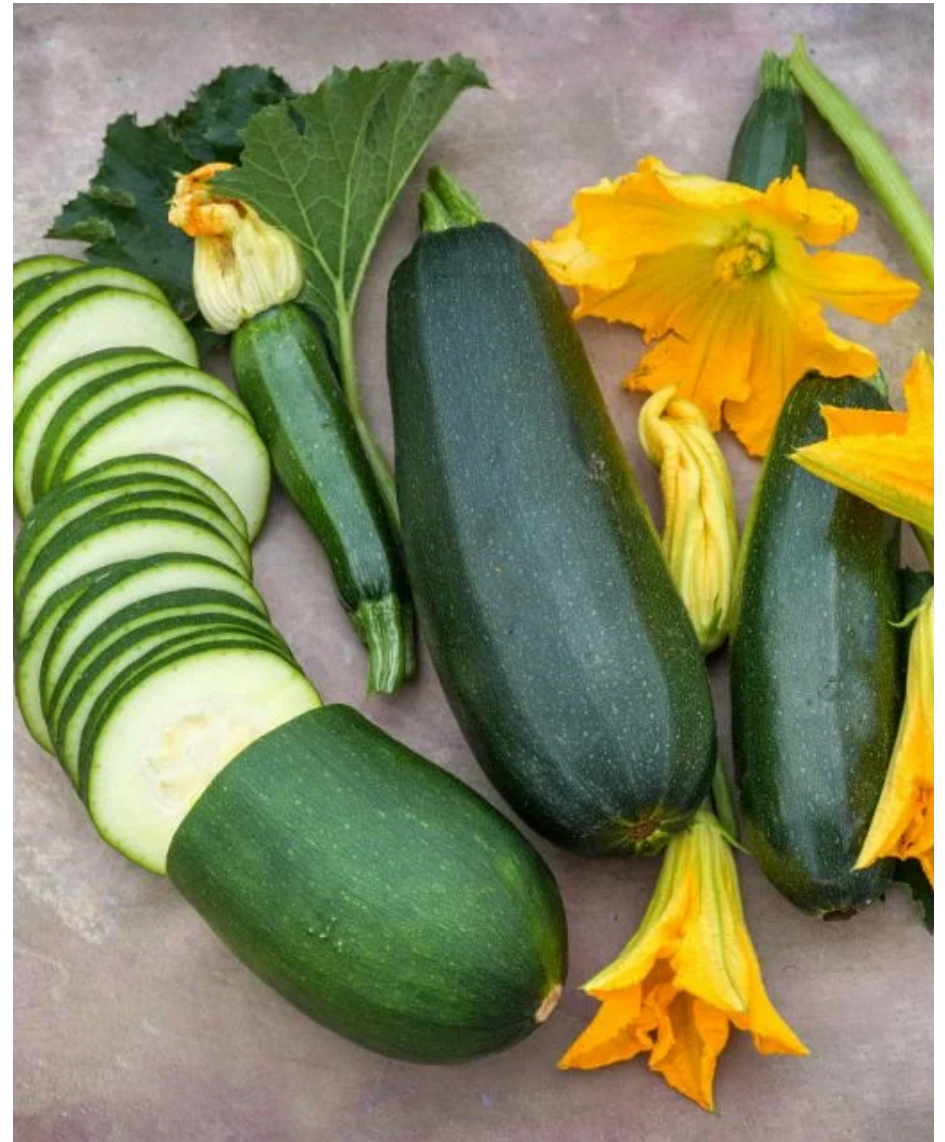

ZUCCHINI BLACK BEAUTY

Description:

Black Beauty zucchini plants typically grow to be 2-3 feet tall and wide. They are bush-type plants, meaning they don't climb and have a compact, leafy branching habit. These everbearing bush plants are loaded with glossy green-black fruits with firm white flesh. Best eaten when under 8" long. Excellent variety for freezing. Also can be used steamed, sauteed, baked, roasted and used in soups

Days To Maturity: 45 - 55

SUMMER SQUASH ZEPHYR F1

Description:

Distinctive, slender fruits are yellow with faint white stripes and light-green blossom ends. Harvest young at 4"-6" for unusually delicious, nutty flavor and firm texture. Vigorous, high-yielding plants grow 18" - 24" tall. NOTE: Under certain stressful situations, such as hot weather, Zephyr fruits can show some variability in the amount of green at the blossom ends. In addition, sometimes the first one or two fruits produced can be green-striped.

Days To Maturity: 54

SUMMER SQUASH Y STAR SCALLOP

Description:

A compact, summer squash cultivar growing 2' tall and 3' across, producing flattened, yellow, round squashes with scalloped edges. Plants begin producing early and remain prolific throughout the season. Excellent flavor; harvest when small and tender, about the size of a teacup.

Days To Maturity: 55

SUMMER SQUASH

YELLOW CROOKNECK

Description:

This old-time variety is also an all-time favorite. It wins hands down when it comes to sweet buttery flavor and firm texture. Vigorous 4'-5' tall bushes will provide you with an abundance of bright yellow, warted, crookneck fruit. Best harvested at 5"-6" long for the best flavor and texture.

Days To Maturity: 50-60

SUMMER SQUASH SUCCESS PM

Description:

Success PM summer squash plants typically grow to be around 12"-18" tall and wide. These plants are known for their compact, bush-like growth habit, making them suitable for smaller gardens or containers. Prolific, disease resistant plants with smooth, uniform and attractive fruit.

Days To Maturity: 50

SUMMER SQUASH

PATTISON PANACHE

JAUNE ET VERT

Description:

Jaune et Verte (also known as Pattinson Panache) is a French heirloom pattypan or scallop squash celebrated for its striking cream-ivory and green-striped skin and excellent culinary flavor. It is popular for its high yields, creamy flesh, and versatility, often used when young and tender for cooking or left to mature as ornamental, hard-shelled squash.

Days To Maturity: 50 Days

SUMMER SQUASH BENNINGS GREEN TINT SCALLOP

Description:

Fruit are a gray-green in color, scallop-shaped and creamy but firm in texture. They are best harvested at three inches in diameter. The plants are productive, early maturing, bush-type, and relatively compact growing 12"-18" tall and 24"-48" wide. Best used for sautéing, steaming, stuffing, grilling, or baking. Due to its tender flesh and scalloped shape, it is ideal for holding fillings.

Days To Maturity: 50

WINTER SQUASH SPAGHETTI

Description:

Slightly sweet, nutty flavor. Fruits are 3-5 lbs, oblong in shape with ivory skin that changes yellow when mature. 5-8 ft long vines. An excellent pasta alternative — bake or boil, fork out the flesh, and top the "spaghetti" with your favorite sauce.

Days To Maturity: 90-100

WINTER SQUASH RED KURI

Description:

Red Kuri is a teardrop-shaped, striking red-orange winter squash from Japan. The plants produce 2-3 fruits that weigh 3-4 lbs each on long 4'-6' long vines. The dark orange, smooth fruits are have a dry orange flesh and a sweet, nutty flavor. Great for fall and winter cooking either sliced, steamed, or baked.

Days To Maturity: 90 - 95

WINTER SQUASH

WALTHAM BUTTERNUT

Description:

Waltham Butternut Winter Squash is a larger butternut than others growing 3-6 lb straight neck fruits. Plants grow up to 2' tall and 4' wide with 9' long high-yielding vines. The rich, dry, yellow-orange flesh has a nutty flavor great for baking, roasting, soups, salads, breads, and curries. Exceptional keepers.

Days To Maturity: 85 - 110

WINTER SQUASH

NUTTERBUTTER BUTTERNUT

Description:

Uniform, bell-shaped personal-sized 2.5-3.5 lbs fruits with consistently nutty, sweet flavor. Plants grow 9"-18" tall with vines reaching 10'-15' long. Great for soups, salads, sides, and pasta dishes. Slight resistance to powdery mildew.

Days To Maturity: 90 days

WINTER SQUASH

HONEYNUT BUTTERNUT

Description:

Honeynut butternut Squash vines can grow to be 2'-3' long making them a compact variety well-suited for small gardens. The small, 4"-5" sized fruit has a sugar-sweet taste and deep orange flesh. Stores well. Resistant to powdery mildew. Great for roasting, pureeing, and adding to soups, stews, and braises.

Days To Maturity: 100

WINTER SQUASH

SWEET REBA ACORN

Description:

The name REBA stands for Resistant Early Bush Acorn. A compact, bush variety growing 1'-3' tall and 2'-3' wide. Plants produce 4-5 fruits per vine with a dry, sweet flesh. The small, deep green, ribbed fruit with a yellow spot weighs 2-2.5 lbs each. Leaving the squash on the vine longer, will promote more sugar production and increase sweetness. Great in baked goods, soups, stews, and purees. Resistant to powdery mildew.

Days To Maturity: 90

WINTER SQUASH QUEENSLAND BLUE

Description:

Dark blue-green ribbed rind with flesh that is meaty, sugary, brilliant orange, and abundant. Plants grow 1'-3' tall, with 10' long vines and striking grey foliage. Fruits average about 10 lbs each, but can grow between 6-20 lbs. Late to mature, long shelf life. Great for baking, roasting, soups, and pies.

Days To Maturity: 110 - 120

WINTER SQUASH DELICATA

Description:

The mild, orange flesh of delicata squash has a nutty, yet sweet flavor. It's a bit like a cross between butternut squash and sweet potato. High sugar content. Each fruit weighs about 1-3 lbs, and their skin color is rust-white with green stripes. The flavor is sweet, creamy and delicate. Delicata squash are packed full of vitamins A & C, magnesium, potassium, and fiber.

Days To Maturity: 100

WINTER SQUASH

BURGESS BUTTERCUP

Description:

Burgess Buttercup produces lots of dark green, 3-5 lb fruits with a gray button on the blossom end. The golden orange, stringless flesh has a sweet, rich flavor. Plants typically produce 10-12 fruits per plant growing 20" tall and 4'-5' wide with vines reaching 15' long. Best used roasted, steamed, in soups or stews. You can cook it with the skin on or off.

Days To Maturity: 95

WINTER SQUASH

BRÛLÉE BUTTERNUT

Description:

Super small and super sweet, if you love Honeynut but wish it stored longer and was powdery mildew resistant, meet Brûlée. Uniform, squat fruits have a rich, sweet and savory flavor. Brûlée butternut squash plants can grow to be 12"-24" tall, but their vines can spread up to 15' long. Great for making creme brûlée desserts, roasted, in soups or casseroles. Very high yields, stores well.

Days To Maturity: 90 - 95

WINTER SQUASH

BABY BLUE HUBBARD

Description:

Light gray-blue, 4-6 lb. fruits grow on space-saving semi-bush vines. 1'-3' tall plants with vines that spread up to 10' long. The thick orange-yellow flesh is sweet and dry with excellent flavor. Used in soups, stews, pies, casseroles, roasted, added to pasta sauces, or even pureed into dips and desserts.

Days To Maturity: 90 - 120

PUMPKIN

WINTER LUXURY

Description:

Winter Luxury pumpkins are best used for baking, particularly pumpkin pie. They also make a great pumpkin puree and are delicious roasted. They are known for their velvety texture and rich flavor. Their orange skin is slightly netted (similar to cantaloup). The large plants are vigorous and full, growing 6'-12' tall with 6'-12' long vines. Each vine can produce 3-4 medium-sized pumpkins of 6-10 lbs.

Days To Maturity: 100 - 110

PUMPKIN

WEE BE LITTLE

Description:

The Wee Be Little variety is a true miniature pumpkin that produces small, round 3"-3 1/2" fruit. A bush type plant growing 24"-48" tall with vines of 4'-6' long. Fruits are tasty and sweet, with a thick orange flesh. Great for baking, roasting, canning, roasting seeds, carving and fall decorating. Stores especially well.

Days To Maturity: 95

PUMPKIN JACK BE LITTLE

Description:

These tiny, decorative pumpkins are 3"-4" across and 2" tall. Compact vines (3'-5' long) grow 6-10 fruits on each plant. Can be grown in a large container and trellised to grow vertically. Each plant will produce an average of eight pumpkins. Great for decorations and raw fruit can be hollowed out to make a cute serving dish.

Days To Maturity: 95

PUMPKIN LONG ISLAND CHEESE

Description:

Long Island Cheese is an heirloom pumpkin variety with flat, lightly-ribbed 6-15 lb fruit that looks like a wheel of cheese, with buff-colored skin. Plants can grow to be 12"-18" tall and 24"-36" wide. The vines can grow to be at least 10' long. A very good keeper, of excellent quality. Great for baking, roasting, and making soups. They can also be used as a substitute for butternut squash.

Days To Maturity: 105

CARVING PUMPKIN HOWDEN

Description:

Howden pumpkins make an excellent carving pumpkin and eating pumpkin. 4' long vines produce large bright orange fruits of 20-30 lbs each with sturdy handles and defined ribs. High in fiber and essential minerals, the colorful orange flesh signifies the abundance of beta-carotene.

Days To Maturity: 90 - 110

PIE PUMPKIN

NEW ENGLAND PIE

Description:

New England Pie is a dark orange skinned, stringless heirloom pumpkin that grows on 4'-8' long vines. Fruits are 8"-10" in diameter and weigh 4-6 lbs each. An excellent pie pumpkin also well suited for roasting and stewing and making soups.

Days To Maturity: 105

PUMPKIN CINDERELLA

Description:

A beautiful French heirloom variety with large, flattened bright red-orange fruits of 15-20 lbs each. The deep, thick and strong orange flesh has a sweet flavor that is great for soups and purees. (Can even be used as a soup toureen!) Plants produce long vines of 3'-7'.

Days To Maturity: 99

PUMPKIN CASPER

Description:

Casper pumpkins are a white heirloom pumpkin with an orange flesh of excellent eating quality. The skin is less blue, smoother and has less ribbing than other white pumpkins. Plants are large with long vines spreading 10' - 20' long. Fruits grow 9" - 12" in diameter producing about 10-15 lbs of fruit per pumpkin.

Days To Maturity: 90 - 115

PIE PUMPKIN BABY PAM

Description:

Baby Pam pumpkins are known for making great pie's. The plants are very large growing 10' - 12' vines and producing large yields of 5" fruits (3-4 lbs each) that are bright orange, stringless and uniform in shape. Also great for carving and painting.

Days To Maturity: 99

CAULIFLOWER

ROMANESCO

Description:

Romanesco is a hybrid variety cauliflower producing bright green 6"-7" heads. Plants can grow to be 1'-3' tall and 1'-2' wide. Romanesco tastes similar to a mix between broccoli and cauliflower, but with a milder, sweeter, and nuttier flavor. Disease Resistant to Fusarium Yellows.

Days To Maturity: 75 - 95

CABBAGE

RED EXPRESS

Description:

Red express cabbages are an early variety compact cabbage plant growing 8"-12" tall and 8"-12" wide. A great choice for small gardens or containers. Uniform, dense heads are a lovely purple color, medium-sized, 2-4 pounds and have a crunchy texture.

Days To Maturity: 62
Spring / Fall

CABBAGE

COPENHAGEN MARKET

Description:

Copenhagen Market is a Danish heirloom variety cabbage yielding hefty, dense heads that are 6"-8" in diameter and weigh about 3-4 lbs each. They are round, medium-green to bluish-green and compact. Plants grow 12"-16" tall and 24" wide.

Days To Maturity: 65 - 70

KOHLRABI DELICATESSE WHITE

Description:

This kohlrabi has it all! Juicy, crunchy, crisp stems and a slightly spicy, sweet flavor. the plants grow 12-17" tall and reach 22-28" in diameter. Beautiful, smooth globes in a lovely light green color. They are quite uniform, and the flesh is tender and of high quality. These stay tender even as they mature.

Days To Maturity: 65

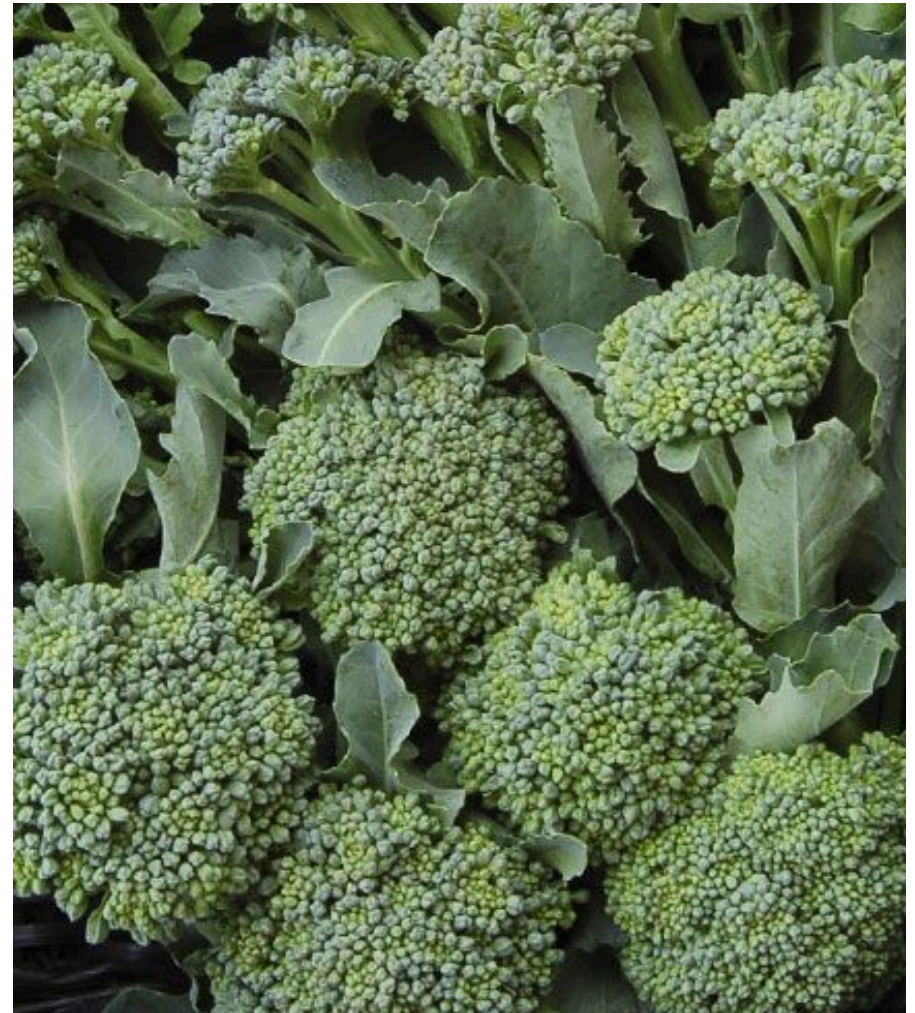

BROCOLLI DICICCO

Description:

An Italian heirloom variety known for tender stalks and sweet, nutty flavor. Reliable multi-cut variety that produces a compact, 3"-4" bluish-green central head followed by a prolific set of side shoots producing many small to medium-sized heads throughout the summer. The leaves can be eaten like kale in the fall. Plants grow 1.5' - 3' tall and 1' wide. A great variety for freezing but can also be eaten fresh, sauteed, boiled, steamed, roasted or added to many different dishes.

Days To Maturity: 50 - 65

OKRA

CLEMSON SPINLESS

Description:

Clemson Spineless Okra is an heirloom variety of okra that produces dark green, grooved pods that are spineless. Plants grow 4'-5' tall with cream flowers that are edible. The pods can grow up to 9" long but are more tender and flavorful if harvested at 3" - 4" in length. It's a favorite for soups and stews, but can also be canned, fried, roasted, or boiled.

Days To Maturity: 55 - 65

OKRA BURGUNDY

Description:

Burgundy Okra is a stunning 4' tall plant with burgundy accents and tender burgundy pods up to 6" long. Good yields. Great choice for pickling, soups and stews, grilling, frying and baking.

Days To Maturity: 55 - 65

OKRA STAR OF DAVID

Description:

Star of David (aka Old Fashioned Okra) grows 7' tall plants with purple coloration on leaves and thick pods that are best picked at about 3" long. Cross-sections of pods look like the Star of David, giving this variety its name.

Days To Maturity: 60 - 75

OKRA SILVER QUEEN

Description:

Silver Queen Okra is an heirloom variety that produces light green, almost white pods. Pods remain tender at 6" long and have minimal ribs or spines. Silver Queen plants can grow to 6' tall. They contain a mucilaginous substance that thickens sauces and stews, and can be eaten both raw and cooked.

Days To Maturity: 55 - 80

EGGPLANT

ROSA BIANCA

Description:

Rosa Bianca eggplants are an Italian Heirloom variety growing 2' - 3' tall. Fruits are 4" - 6" long, lavender to purple with soft white shading and a gently scalloped form. Their mild flavor and creamy texture makes them a good choice for eggplant parmesan, pasta dishes, and caponata. Best used baked or grilled.

Days To Maturity: 75 - 80

EGGPLANT SWEET RED

Description:

This Ethiopian eggplant variety produces 5"-7" round to oval shaped, flavorful fruit that tastes moderately sweet and looks absolutely stunning. Highly branched, 1.5' - 2' tall vertically growing plants bear fruit in clusters of up to six. 'Sweet Red' eggplants can be eaten both raw and cooked, but are best enjoyed while still mostly green before ripening to an orangish red.

Days To Maturity: 90 - 100

EGGPLANT

PING TUNG LONG

Description:

This variety of eggplant originates from Ping Tung, Taiwan and grows 24" - 30" tall. The purple fruit grows up to 14" long and 2" in diameter with a thin skin that doesn't require peeling. Considered one of the most favored varieties as it is so sweet and tender. Used in many Asian dishes. Can be grilled, baked, sauteed, fried or pickled.

Days To Maturity: 65 - 80

EGGPLANT

LISTADA DE GANDIA

Description:

Listada De Gandia eggplants grow on small 14" tall plants. They produce heavy yields of high-quality, 8" oval white fruits with purple stripes and sweet, white, thinskin flesh. The variety thrives in very hot weather. A stunning variety great for roasting, baking, stewing and grilling.

Days To Maturity: 80 - 90

EGGPLANT CASPER

Description:

Compact plants grow 2'-3' tall and 18" - 24" wide producing snow-white 6" by 2" diameter fruits with mild flesh. Peeling is not necessary if eaten when small. Great for roasting, baking, stewing and grilling.

Days To Maturity: 66 - 75

EGGPLANT

BLACK BEAUTY

Description:

Black Beauty eggplants are compact plants growing 2'-3' tall and can be grown in containers that favor a southern facing location. Dark purple, glossy fruits weigh up to 2 lbs. each with a high-quality, traditional eggplant flavor. Can be grilled, baked, sautéed, stuffed, or fried.

Days To Maturity: 70 - 80

EGGPLANT THAI GREEN

Description:

Thai green eggplants are known for their firm, crunchy texture, mild/slightly bitter flavor, and superior ability to absorb flavors in authentic Thai curries, such as green curry, without turning mushy. They are highly prized for being tender enough to eat raw (unlike other eggplants) and for maintaining their shape when cooked, making them excellent for stir-fries, dips, and stews.

Days To Maturity: 70 - 80

POPPING CORN GLASS GEM

Description:

Sturdy plants can reach 10' tall producing 6"-8" long ears. Used in fall decorating or for popping. Requires a fairly long growing season for favorable yields.

Days To Maturity: 105

SWEET CORN BLUE JADE

Description:

One of the only sweet corns that can be grown in containers. These 3-foot-tall plants bear 3"-5" long ears and produce 2 ears per stalk. Peak time for eating is when kernels are just turning blue, but can be eaten when white or steel blue. Great for fresh eating, freezing and decorations.

Days To Maturity: 70 - 80

SWEET CORN SUGAR BUNS

Description:

Sugar Buns Sweet corn is known for its superbly sweet flavor and long harvesting period. Beautiful 7-inch ears with 14 rows of sweet, tasty, yellow kernels grow on sturdy 5'-6' tall plants. An excellent choice for eating on the cobb as well as for making cornmeal and flour.

Days To Maturity: 70 - 75

Sugary Enhanced (se+) variety

SWEET CORN MIRAGE

Description:

Mirage sweet corn is a hybrid corn variety growing 7' tall and averages 2 white ears per stalk with 16 rows of kernels. Ears start 2.5' from the ground for easy harvest and are well wrapped in dark green husks. Resistant to common rust, northern corn leaf blight and Stewart's wilt.

Days To Maturity: 79

Sugary Enhanced (se+) Variety

SWEET CORN

FISHER'S EARLIEST

Description:

Vigorous, multi-colored 5'-6' stalks with one ear per plant sitting 18" high. Ears grow 10-12 rows of kernels; excellent tip fill and husk cover. All su's should be picked and eaten quickly as ears lose sweetness rapidly post-harvest.

Days To Maturity: 70
Standard (su) Variety

SWEET CORN

WHO GETS KISSED

Description:

"Who Gets Kissed?" is a sweet corn that is great for small gardens. Plants grow 5'-6' tall and produce ears of corn about 6"-7" long. It has an extended harvest window. Good tip fill and husk coverage. Disease resistance to common rust and smut.

Days To Maturity: 78 - 84

Sugary Enhanced (se+) Variety

SWEET CORN ALLURE F1

Description:

Impressively uniform 6'-7' tall stalks produce slender white and yellow bi-color ears about 8" long. Allure F1 corn is a sweet corn hybrid variety that can be used for eating, decorating, and making cornmeal. Resistant to common rust and Stewart's wilt

Days To Maturity: 75

Sugary Enhanced (se+) Variety

ARTICHOKE GREEN GLOBE

Description:

Green Globe artichokes are a perennial in zones 7 and higher. In zones 6 and lower, it can be grown as an annual. These heirloom plants grow 3'-5' tall and produce about 3 to 5 purple-tinged edible flower buds per plant in the first year. The flower fruits are 3"-5" in diameter and have thick, flavorful heart. Artichokes are best when they are boiled or steamed.

Days To Maturity: 75

POLE BEANS

SEYCHELLES

Description:

Seychelles beans grow in clusters on bush plants that can vine up to 6' tall and require staking or trellising. The slender, uniform green pods are typically 4"-6" long and are stringless with a crisp, tender texture and slightly sweet, fresh taste. Seychelles beans are also known to improve nitrogen levels in the soil. Resistant to anthracnose and bean common mosaic virus. Great for eating fresh or for canning.

Days To Maturity: 55

Emerald Gem melon plants typically grow 4'-5' long, and heavily produce melons that weigh 2-3 pounds each. The pale orange flesh is juicy sweet, with a typical melon spiciness and fragrance.

Days To Maturity: 70 - 90

MELON

EDENS GEM

Description:

Eden's Gem is an early maturing honeydew-type melon with plants growing 12" - 18" tall and 36" - 48" wide. The 4" - 6" round, netted fruits weigh about 1 pound each and contain a honey sweet, almost spicy, complex flavor with subtle floral undertones.

Days To Maturity: 80 - 90

MELON CHARENTAIS

Description:

A superbly sweet and juicy, French cantaloupe with smooth round fruits that mature to a creamy gray with faint green ribs. It's orange flesh has a heavenly fragrance as well. Plants grow 4'-5' tall and 4' wide. Fruits are small, weighing about 2 pounds each. Perfect size for two people to share. It is best enjoyed sliced and eaten fresh.

Days To Maturity: 75 - 90

MELON

BOULE D'OR

Description:

Plant 3-4 Boule D'Or melons in a 12" diameter hill and space 6' apart. These beautiful plants produce lovely yellow honeydew type fruit growing 7" - 10" in diameter. The sugary pale green flesh is so flavorful, rich and sweet. Harvest when fruit easily pulls off the vine. The hard rind makes for a long lasting shelf life of up to several weeks if kept cool and dry.

Days To Maturity: 95 - 110

MELON BITTER

Description:

Bitter melon is a tropical vine that belongs to the gourd family. This Okinawa heirloom vegetable is high in vitamin C and vitamin A. It also contains small amounts of folate, iron, potassium and vitamin K. While not recommended for pregnant women or people taking blood sugar lowering medicines, used in moderation, it has been shown to have cancer fighting properties, reduce cholesterol, and reduce blood sugar levels. The large tropical vines grow up to 16' long and 3' wide producing green bumpy fruit of 3"-4" around and 8"-10" long. Containing a strong bitter taste, it is often used sauteed, sliced and stuffed with meat or vegetables, and is a key ingredient in many asian recipes.

Days To Maturity: 75

PERSONAL WATERMELON

SUGAR BABY

Description:

Sugar Baby watermelon plants can grow to be 18"-24" tall and 5' - 6' wide. It's Perfectly rounded fruits range from 7" - 8.5" in diameter (6 - 12 lbs each) with a solid dark green rind and deep red flesh. Plants are drought tolerant, early to mature and reliably yield several sweet, juicy melons with small seeds. The thin rinds are still fairly tough, helping it store well.

Days To Maturity: 85

PERSONAL WATERMELON

SMALL SHINING LIGHT

Description:
